

We are always striving to find design solutions that are innovative and outside of the ordinary. We believe that good Architecture is founded in a positive dialogue between the client and the architect and that Architecture should not be an imposition of ideas. It should rather stem from a deep understanding of the site, its context and the client's needs synthesized with our expertise and insight. We also believe that it is our duty to unlock potential wherever possible and look beyond the brief for opportunities and sustainable solutions.

THE TEAM

We are an Architectural Team based in Cape Town. We have successfully completed an ambitious number of projects that we are very proud of. We are a solution driven and dynamic always keen to take on new architectural and design challenges. We pride ourselves in being at the forefront of design and technology both in our design process and execution and we are constantly looking for better ways to communicate ideas with our clients so they have the best possible understanding of what the final product will be.

With extensive experience in a wide variety of projects and all phases of design and construction we are in the position to offer a full scope of architectural services at a very high standard.
